Tools: Git, VS Code, Postman, MongoDB Compass, Firebase, Vercel, Lucidchart, Cursor AI

PROJECTS

1. Recipe Community

[Live Site](#), [Client Repo](#), [Server Repo](#)

SRS Recipe Community is a platform where food lovers can discover, share, and explore a variety of delicious recipes, enhancing their skills and experiences together. It also has a premium membership for accessing paid recipes.

Features:

- **Membership System:** A secure platform for managing registrations, subscriptions, and benefits
- **Rating and Comments:** A system for users to rate and provide feedback on recipes.
- **Payment Gateway:** Enables secure online payments for membership. They can then access pro content

Technologies: Next.js, TypeScript, Tailwind CSS, Next UI, Express, MongoDB, Mongoose

2. SRS Sport

[Live Site](#), [Client Repo](#), [Server Repo](#)

SRS Sport allows users to choose fields for specific time slots, accessible after payment. Players can only use the field during the time slots they have purchased. Comprehensive help and support are always available if players need them.

Features:

- **Booking Facilities:** Users can easily book sport slots through a smooth, intuitive process
- **User Dashboard:** A personal interface to manage bookings, view history, and update preferences
- **Payment Gateway:** A secure system for processing transactions and completing bookings

Technologies: React, TypeScript, Ant Design, Tailwind CSS, Express, MongoDB, Mongoose

3. Library Management

[Live Site](#), [Client Repo](#), [Server Repo](#)

A web-based library management system for browsing, borrowing, and managing books, built with React, Redux, and TypeScript for a seamless user experience. Here have 3 limit book for free user and 3 type Membership for pro User.

Features:

- **Package System:** A flexible system with 1-month, 6-month, and 1-year membership packages for users.
- **User Dashboard:** Interfaces for users to manage bookings, and for admins to control bookings and users.
- **Payment Gateway:** A secure Stripe system for processing transactions and completing bookings.

Technologies: React, TypeScript, Ant Design, Tailwind CSS, Express, MongoDB, Mongoose

COURSES

Completed Web Development

[Certificate](#)

Duration: July 2023 – January 2024

Institution: Programming Hero

Next Level Web Development

Duration: April 2024 – October 2024

Institution: Programming Hero
